

ELSEVIER

Ecological Modelling 99 (1997) 297

**ECOLOGICAL  
MODELLING**

## Contents of *Ecological Modelling*, Vol. 99

VOL. 99 NO. 1

16 JUNE 1997

Toxicity may affect predictability of eutrophication models in the coastal sea T. Legović (Zagreb, Croatia) . . . . .	1
On some general properties of trophic networks Y.M. Svirezhev (Potsdam, Germany) . . . . .	7
A model of phytoplankton growth on multiple nutrients based on the Michaelis–Menten–Monod uptake, Droop's growth and Liebig's law T. Legović (Zagreb, Croatia) and A. Cruzado (Blanes, Spain) . . . . .	19
Emergy/exergy ratio as a measure of the level of organization of systems S. Bastianoni and N. Marchettini (Siena, Italy) . . . . .	33
Exergy and structural exergy as ecological indicators for the development state of the Lake Chaohu ecosystem X. Fuliu (Hefei, People's Republic of China) . . . . .	41
Analysis of nutrient-cycling dynamics, for predicting sustainability and CO <sub>2</sub> -response of nutrient-limited forest ecosystems H.N. Comins (Sydney, NSW, Australia) . . . . .	51
A case of combined use of crop simulation models and general linear models V. Trouslard-Kerdiles (Castanet Tolosan, France) and M.O. Grondona (Buenos Aires, Argentina) . . . . .	71
A model for predicting forest fire spreading using cellular automata	

VOL. 99 NOS. 2,3

30 JUNE 1997

Simulating effects of S and N deposition on soil water chemistry by the nutrient cycling model NuCM T.A. Sogn and G. Abrahamsen (Ås, Norway) . . . . .	101
Individual-based modeling of PCBs effects on young-of-the-year largemouth bass in southeastern USA reservoir J.S. Jaworska, K.A. Rose and A.L. Brenkert (Oak Ridge, TN, USA) . . . . .	113
Temporal fire disturbance patterns on a forest landscape C. Li, M. Ter-Mikaelian and A. Perera (Sault Ste. Marie, Ontario, Canada) . . . . .	137
A new model for the prediction of rainfall interception in forest canopies S. Liu (Gainesville, FL, USA) . . . . .	151
Dynamic linear Bayesian models in phytoplankton ecology D. Soudant, B. Beliaeff (Nantes, France) and G. Thomas (Paris, France) . . . . .	161
Frequency distributions and transformations of lake variables, catchment area and morphometric parameters in predictive regression models for small glacial lakes L. Håkanson and M. Lindström (Uppsala, Sweden) . . . . .	171
Mature size determination in copepods: The adaptive significance of mature size in copepods: output or efficiency selection? K. Omori (Matsuyama Ehime, Japan) . . . . .	203
Wind induced sediment resuspension: a lake-wide model M.C. Bailey and D.P. Hamilton (Nedlands WA, Australia) . . . . .	217
Scaling artefacts in confinement experiments: a simulation model R. Mac Nally (Clayton, Australia) . . . . .	229
Temporal variation of C and N turnover in soil after oilseed rape straw incorporation in the field: simulations with the soil-plant-atmosphere model DAISY T. Mueller, L.S. Jensen, J. Magid and N.E. Nielsen (Frederiksberg C (Copenhagen), Denmark) . . . . .	247
Fixed versus variable-parameter matrix models of forest growth: the case of maple-birch forests C.-R. Lin and J. Buongiorno (Madison, WI, USA) . . . . .	263
A root-morphology based simulation for plant/soil microbial ecosystem modelling T.N. Brown, D. Kulasiri and R.E. Gaunt (, New Zealand) . . . . .	275
A simple formula for calculating the lower limit of Shannon's diversity index J.-N. Beisel and J.-C. Moreteau (Metz, France) . . . . .	289
Author index . . . . .	293
Subject index . . . . .	295
Volume contents . . . . .	297
